

DAY ONE

at Crime Victim Services

Holistic Healing for Survivors

Day One of Crime Victim Services exists to provide holistic healing for survivors of sexual violence and human trafficking. Our dedicated, professional advocates walk alongside survivors throughout their healing journey, providing comprehensive services in Allen, Auglaize, Putnam, and Hardin Counties.

We're Here to Help

We provide a 24/7 hotline, 24/7 medical advocacy at local hospitals, crisis intervention and safety planning for survivors of sexual violence and human trafficking. Additionally, we offer ongoing support and case management services, therapy, support groups and legal advocacy in local court systems.

We also give assistance and linkage to other services in our community for basic needs. We coordinate our local Sexual Assault Multidisciplinary Action Response Team to ensure systems coordination for survivors. We assist partners in developing protocols to provide them with a process of how to identify and help survivors.

Campus Specific Services

We walk alongside any college student impacted by sexual violence and those who are going through the campus conduct or Title IX process. We ensure they receive supportive advocacy and safety planning throughout the process and after it is completed.

Outreach & Training Opportunities

We strive to reach out to communities who have higher rates of victimization but have not been served due to various barriers. We want to ensure survivors of sexual violence and human trafficking know about our services and receive culturally appropriate, trauma responsive care when they come to us for help.

We offer basic and advanced training to community members, college students, and professionals on trauma, sexual harassment, sexual violence, human trafficking, cultural humility, Title IX, and bystander intervention.

Survivor Testimonial

"Through the help of Crime Victim Services, Crossroads Crisis Center, and a few officers I was able to stand up for myself for the first time ever. After my abuser and trafficker was put in prison, I was able to relax and take a look at my life. The God I was asking to take my life now is the God I thank for waking me up everyday.

Since then with a lot of help from a lot of social workers at Crossroads and Crime Victim Services I was able to start to build my life. I went to school to become a Community Health Care Worker and worked with high risk pregnant women. I now am back around my family he isolated me from. I am independent, working and back in school to finish my social work degree. I am loving life."

Krista Starr, trafficking survivor
